## **The Meridian Connection Course at Body Technic Systems, Inc, April 27-28<sup>th</sup>. Registration link below.**

**Your instructor Randall Gibson, M.Ed., LMT (*Email: [Randall@polarityhealthcare.com](mailto:Randall@polarityhealthcare.com)*)**

Randall has been a licensed massage therapist in Ohio and Florida for over 30 years and taught massage therapy professionally for 20 years while maintaining a private practice in massage and craniosacral therapy. His certifications include craniosacral therapy, polarity therapy, shiatsu, and neuromuscular massage therapy. Randall is also certified as a meditation and mindfulness teacher as well as a HeartMath® practitioner.

Randall shares his knowledge and passion by offering CE seminars for integrative massage therapists and anyone interested in healing.

**What if you could skip the non-essentials, simplify the philosophy, and learn material you will be able to use on Monday morning? If that sounds appealing, join us! This two-day seminar will take the mystery out of meridians.**

We focus on applying acupuncture concepts to massage therapy assessment and treatment. You will become familiar with some acupuncture points but the real emphasis is on the meridian itself. You will learn to trace fourteen meridians from memory and discuss the associated muscles, organs, emotions, and pathologies.

Expect to become comfortable locating acupressure points as well as using combinations of points to treat meridians, organs and systems. We will use intention as well as physical stimulation in this approach. Our own personal meridian systems will be balanced several times throughout the weekend and we will finish by practicing assessment and treatment in triads. If you keep hearing about meridians and wish you understood them better, this is a rare opportunity to increase your confidence and therapeutic effectiveness by spending two days immersed in them.

This material will be appreciated by practitioners of Touch for Health Kinesiology, chi gung or tai chi. The practical concepts and hands-on techniques are useful for anyone who is interested in meridians and health.

**There are NO PREREQUISITES for this seminar. It is open to everyone.**

## CORE BENEFITS

Develop basic skill at locating, evaluating and treating 14 meridian channels.  
Develop basic skill at locating, evaluating and treating major acupuncture points.

## WHY TAKE THIS TWO-DAY CLASS?

---

By participating in this class, you will:
